Support for designers

ETICAD is a library of ETI products, suited for electro designers.

INSTALLATION of the ETICAD

Requirements: preinstalled one of the following CAD program:

- AutoCAD 2000 - 2017 (32/64bit)
- AutoCAD LT 2000 - 2017 *) (32/64bit)
- AutoCAD Architecture 2000 - 2017
- AutoCAD MEP 2008 - 2017
- AutoCAD Mechanical 2000 - 2017
- BricsCAD V4 - V17
- ZWCAD 2008i - 2012, ZWCAD+**, ZWCAD Classic, ZWCAD 2017
- 4M CAD V14 - V16
- progeCAD 2008 - 2017
- CADopia 8
- StarICAD 2008
- GstarCAD 2010 - 2017
- ArCADia IntelliCAD 5, 6, 2009 SE, 7.2, 10
- CMS IntelliCAD 7.2, 8.1, 8.2 x64
- BitCAD V6
- IntelliCAD 5, 6, 7.2, 8.1
- IntelliPlus 8, 2013 - 2014
- JetCAD 2012
- ARES Commander Edition 2012 - 2016
- CADian 2012 - 2017
- FineELEC 11
- CADMATE 2015 - 2016
- AviCAD 2014 - 2017
- NUVOCAD 2013

Download **ETICAD** file from <http://www.etigroup.eu/support>

ETI CAD

Plug-in library for various CAD programs (AUTOCAD, ZWCAD, BRICSCAD, GSTARCAD...)

ETI CAD Installation instructions

ETI CAD

The size of the file is 260MB, so it takes some time for download.

Before you run downloaded ETICAD exe file, be sure, that CAD program (one from the list) is preinstalled and closed.

- Install the file in your computer with double click on ETICAD exe file. Some CAD programs needs also an additional plug-in. Also, with some versions of system or antivirus, you need a time of five minutes to install ETICAD.
- The InstallShield Wizard will guide you through the installation.

Support for designers

- A shortcut to ETICAD appears on your screen. 
- With this short-cut, you get a basic settings of ETICAD. Here you choose a language and also a CAD program, which you will use for designing. With Configure CAD you integrate the ETICAD to your CAD designing program.

- START your CAD program
- ETICAD is presented in CAD program as TAB and as toolbar window.

With first use, please fulfill the registration form (picture down), with the right email and press Activate.

On your email you will receive the confirmation of the installed Eticad.

 We encourage to register an application. Registered users will be informed about new versions of the program and promotions of the commercial version of CADprofi applications. ?

HOW TO USE ETICAD?

INSERTING SYMBOL: ETICAD main window

With ETICAD is inserting of symbol easy and fast.

- Tree product structure for more than 14000 products and multi languages

- Selection of products with search window.
In search window write the main words or reference number (from ETI Catalogue).

Example: in tree window select »ETIMAT 6/Char.B« and in search window write B16.

If you use  button, you search everywhere in tree of products. The filtered products will be all products with “B16” in name (MCBs6, MCBsP10, KZS, LIMATs...).

With  button, you search in the selected branch. Available products will be just ETIMATs 6 with B16 characteristics.

- Each product have a two versions of symbols, vertical/horizontal position, multiline symbols, 2D front view and picture.
- With label window, you can do automatically numbering of inserting products. 

Traditional way (with no ETICAD library)	ETICAD
draw a vertical line	draw a vertical line
search for suitable symbol	search for suitable product in ETICAD
insert a symbol	insert it directly on line
draw another line, continued from symbol	(the line will be automatically terminated and
manually change the product name	product data will be in your drawings)
look for the last used tag label and change it	

Example: If the last used MCB was F6, next name of MCB will be F7.

INSERTING 2D FRONT VIEW

Each product have 2D front view of the product. You can insert it from ETICAD main window or automatically from drawings.

- Use button  in ETICAD toolbar.

Click on the symbol. With selection of “*Insert:2D front*” you can add 2d front view of product in your drawing. With the option “*Repeat the command*” you select the symbols and insert the 2D look faster.

2D front view have the same tag label like symbol (cross-reference)

- If you need only front views, you can do a list of product

- Use ETICAD enclosures with front view for inserting the products

BILL OF MATERIAL

- On ETICAD toolbar use excel  button.
A window appear, with possibility of adding columns of product data.

With NEXT button select objects on drawings and press ENTER.

Insert a name (Title) of bill of material. Here you can also sort data.

With option Draw, you can insert the Bill of material in CAD drawings directly, so it is a part of the drawings.

With option CSV Export you can export a file directly to excel.

Traditional way (with no ETICAD library)	ETICAD
<p>open also excel sheet</p> <p>count the same products in drawings</p> <p>make crosreference tag labels (F1,F3)</p> <p>go to another product on the drawings and repeat the procedure</p>	<p>Use excel button on ETICAD toolbar</p> <p>Select objects and press »enter«</p>

- Some additionally buttons:
 - Frames and tables  ...for frame drawings
 - ETICAD settings
